

Only YOU Can Prevent Incidents on the Job

You're the best defense against injuries so be the hero! Help us guide you with some of the most important incident prevention topics.

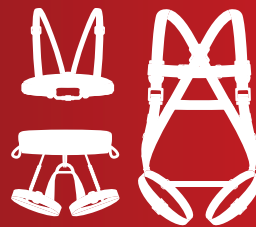

LOCK OUT TAG OUT

- Protect against dangerous energy sources such as electrical, chemical, thermal, & much more.
- Provides workers with the necessary information to securely work around energy sources.
- Prevents use of energy sources with secure locking mechanism.

FALL PROTECTION

- According to OSHA, falls are one of the most common causes of work-related injuries & deaths.
- Fall protection is a reliable prevention source.
- Employers are required to provide fall protection (OSHA 1926.501).

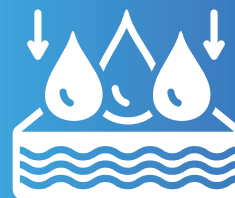

SIGNAGE

- Lets workers know of a potentially harmful situation.
- Indicates & defines the hazards.
- Lets the general public know of danger or risk.

SPILL CONTAINMENT

- Often an overlooked incident prevention topic.
- Keep spill kits in all areas that may require a cleanup.
- Have emergency response plans in place to prepare workers in case of a spill.
