

Ice

Ice Baby!

STOP, COLLABORATE AND LISTEN...

MC Tool & Safety has what it takes to keep you warm when working in Minnesota Winters.

Hats

You can lose a lot of heat from your head so cover your noggin to keep warm!

Gloves

Wear these bad boys as frostbite is one of the most common cold-weather stress injuries – and your fingers are the first to get impacted.

Shoe Traction Devices

Falls are the second leading cause of injury-related death. Prevent it & don't risk falling. Reduce slipping, falling, & injuries by wearing traction devices in snow, ice, and water.

Coats, Jackets & Sweatshirts

Keep that trunk of yours warm – winter gear like coats, jackets & sweatshirts whisk away the cold. In the event of extremely cold weather, your body moves blood to the torso to keep vital organs alive. Keeping your torso warm is a benefit to other areas of the body!

Pants

Repel the snow and cold weather. Take the chill off with thermal, winterized pants.

Layers

Base layers and thermal liners can keep the heat close to your body for all day warmth.
