

How Fusion Can Help Your Business Become More Secure

With Cyber Essentials and Cyber Essentials Plus

Cyber Essentials is a government backed scheme that helps businesses guard against the most common cyber threats and improves cyber security. According to the UK government, "Around 80% of cyber-attacks could be prevented." with just five basic security controls. At Fusion it's our mission to help you meet them with flying colours.

With Cyber Essentials your business will benefit from:

Improved cyber security

Your insurance should become cheaper

You'll become more efficient

It can help with compliance

You'll win more and/or better business

You'll be able to work on government contracts

Cyber Essentials or Cyber Essentials Plus?

There are two certification routes you can take and our first goal will be to help you decide whether which one is right for you. Both options can be the right fit, depending on several factors

Cyber Essentials is ideal for

The business that wants to start taking their cybersecurity seriously and demonstrate this to their customers as quickly (and easily) as possible.

Cyber Essentials Plus is ideal for

Businesses that want to prove beyond dispute that they're taking cybersecurity seriously and gain access to as many clients as possible. This requires a visit from an external auditor.

Cyber Essentials feeds into Cyber Essentials Plus, so if you're torn between the two you can just start with Cyber Essentials and take it from there. Just remember that to gain Cyber Essentials Plus certification you need to have achieved Cyber Essentials within the last 3 months.

Here are six reasons why Fusion is the ideal partner on your Cyber Essentials certification journey

- We have already helped dozens of businesses get certified over the years.
- All our assessors are certified in Cyber Essentials and Cyber Essentials Plus.
- We can tailor our service so you only pay for what you need to get certified.
- Our team has a varied skillset and has an in depth understanding of what security issues businesses are facing today.
- We prioritise quick turnarounds so that you can waste zero time in reaping the Cyber Essentials benefits.
- We take a pragmatic approach to your cybersecurity with all our suggestions focused on fixing what's necessary.

When you get certified with Fusion, our CyberSmart platform will guide you through all the necessary steps

1

Identify and scan for vulnerabilities

CyberSmart will automate this search, no prior technical knowledge is needed.

2

Fix

Offering step-by-step guides and live online support, CyberSmart will help you remediate any cyber issues you have.

3

Certify

With Cyber Essentials achieved, the official Cyber Essentials badge can be provided

4

Protect

CyberSmart will help you monitor and report your businesses security as you maintain the standards you've met during certification.

Fusion uses a tailored approach to get businesses of all shapes up to the standard required by Cyber Essentials. Looking closely at your IT and your team we can guide your business towards gaining certification. So, if you're ready to cement the grade A security status of your business, book a call with a Fusion expert today.
