

Business Continuity & Disaster Recovery and Backup Services

The future is unpredictable, but that doesn't mean you can't be prepared to combat unforeseen challenges. Business Continuity and Disaster Recovery plans (BCDR) are created to protect businesses from suffering the effects of downtime or unexpected crises.

A good BCDR plan goes in hand with a comprehensive backup solution. Together these solutions can guarantee that your business remains operational no matter what. They provide a virtual cushion so your employees can work efficiently, with the knowledge that they can stay connected and productive. At Novem IT, we will introduce solutions to ensure your business is safe and prepared for any event.

Benefits of Backup and BCDR with Novem IT

Be Established as Credible and Reliable

Keep your reputation intact by ensuring your customers' data is safe, and your business is always operational.

Minimise Downtime and Reduce Costs

Implementing a BCDR plan will help your business remain operational, whatever the circumstance. Keeping downtime minimal and costs down.

Be Prepared for Anything

Helping you prepare for the unexpected and implementing the right solutions to mitigate these issues if they arise.

On average, downtime as a result of a disaster can cost SMEs anywhere from £1,000 to £10,000 or more per hour.

The sooner you can be operational after a disaster, the less money is lost.

What's included?

Disaster Recovery & Business Continuity

We will implement processes to protect you against cyber threats, as well as service recovery through thorough Business Continuity planning.

Included in your BCDR plan:

- A detailed consultation so we can outline your priorities and your business needs
- An outline of your recovery objectives so we can restore lost/stolen data and help applications to work again if systems are critically damaged
- An assessment of your existing IT environment and optimisation of your current strategy
- A bespoke BCDR solution that meets your business requirements so we can take the necessary measures to ensure your business is prepared for anything. These solutions minimise downtime so that business operations can continue and recovery quickly should the worst happen.
- We will define your Recovery Time Objective (RTO) and Recovery Point Objective (RPO) to help decrease the impacts of downtime and better manage a disaster when it strikes

Backup

Novem IT provides Backup solutions in partnership with industry-leading vendors, such as Datto and StorageCraft.

Datto provides backup solutions for Cloud, Files and SaaS applications. Whatever you need backing up, we can help.

Why work with Novem IT?

When you call, we pick up

BCDR and backup solutions to meet your business needs

Our comprehensive BCDR plans and backup solutions are designed specifically to your business needs. This ensures that you have protection and support where you need it most.

How have we helped our customers

Arlington Aerospace

We enabled full visibility, IT asset tracking and license management tracking for all IT hardware and software licensing. This created business peace of mind utilising a fully managed and monitored backup solution running hourly increments with offsite data replication.

SF Taylor

We implemented a fully resilient business continuity plan, protecting all digital business assets with daily testing and verification. By installing two internet connections, should the primary line go down, auto-failover ensured their customers can still rely on a stable internet connection, no matter what.

The Land Trust

We installed an upgraded, robust, scalable server backend and a Private Cloud Disaster Recovery solution that offers true Business Continuity. We also provided a fully managed and monitored backup solution running hourly increments with offsite data replication.

Start planning for the future and ensure your business is ready to combat any potential workplace disruptions. Implement a BCDR plan and backup solution today, and safeguard your business.
