Cybersecurity Services

The security of your business and its data is under constant threat. The cybersecurity landscape is always changing, and legislation such as GDPR requires organisations to do more than ever before to ensure data is protected. But don't worry, at Novem IT, we've got your back. Our cybersecurity solutions can guarantee your business is covered no matter what. We handle IT so you can handle it.

What are the benefits of cybersecurity with Novem IT?

Be Established as Credible & Reliable

Your customers want to know that their data and interests are safe and secure. Cybersecurity with Novem IT will ensure your reputation stays intact.

Remote Monitoring and Management

This means the team at Novem IT can proactively look after your IT infrastructure remotely. Our solutions are designed to prevent and protect against ever-evolving cyber-threats.

Keeping Costs Down

A cyber-attack can be crippling and expensive. With Novem IT, we work to keep you protected from cyber-threats and ensure you don't have to suffer the consequences.

Reduction in Downtime

We know your time is valuable, so implementing the best cybersecurity solutions to keep you operational is our priority.

How can we help?

- **Automated Patch Management**

  We provide automated software updates for third-party software vendors including Microsoft, Google Chrome, Adobe Reader, Java etc.

- **Endpoint Protection**

  We provide total endpoint protection from threats such as zero-day malware and ransomware. For total peace of mind, we use Panda Adaptive Defense 360 from Watchguard because of its ability to respond to any advanced threat.

- **Email Security**

  Novem IT use smart solutions to safeguard our clients from cyber-attacks than come in the form of an email including phishing attacks. For maximum protection, we partner with Hornetsecurity and their Advanced Threat Protection because it can protect our clients against all methods of attack.

- **Microsoft 365 Monitoring**

  We can protect your employees and your data in any location, and we will safeguard your company's extended network. To guarantee we can protect your workforce wherever they are, we use Bluedog Microsoft 365 Monitoring, so if you are in the office or not, you can rest easy knowing your data is secure.

- **External Vulnerability Scanning & Penetration Testing**

  Conducting Vulnerability scanning and penetration testing means we can spot errors of weakness and fix them before an attack can happen. We work with Bluedog for this service as they provide a solution to suit all operational scenarios and budgets, with 24/7 support.

- **Dark Web Monitoring**

  Novem IT will monitor the dark web and identify, inspect and proactively monitor your IT. We do this to discover if any of your data has been compromised or stolen. We partner with ID Agent, so we can monitor our customers' systems in real-time and stop an attack, hack or breach before it can occur. Why not click the link to get your FREE dark web scan today.

- **Security Awareness Training**

  We offer security awareness training as part of our cybersecurity package. Aimed to educate your employees on the dangers of the digital landscape and help protect end-users

Why work with Novem IT?

- **When you call, we pick up**

  A friendly, approachable person will always greet you. We are a reliable team that will support your cybersecurity needs no matter the challenge.

- **We have over 20 years of experience**

  We have been protecting our clients from cyber threats and managing cybersecurity for over two decades. Our experience is second to none.

- **We handle everything**

  With Novem IT taking care of every aspect of your cybersecurity, you can rest easy knowing that your systems, data and staff are fully protected.

- **Cybersecurity to support your business needs**

  Our comprehensive cybersecurity solutions are designed specifically to your business needs. This ensures that you have protection where you need it most.

- **Trust that your data is in the right hands**

  Your data matters to us because we understand how much it matters to you.

- **A cybersecurity-conscious culture**

  By implementing the top cybersecurity solutions, you can create a culture that values the importance of cybersecurity.

How we have helped our customers

Novem IT ensured all clients and servers were proactively monitored and patched with zero admin overhead. This gave the team confidence that their systems and data are fully protected for all eventualities. Protect your data from heever-growing threat of cyber-attacks and future-proof your business today.

Novem IT implemented a Duo MFA solution across the entire user base and secured all points of entry. Now ADT Workplace has a layered authentication mechanism for their remote workforce. This has drastically reduced the risk that compromised credentials could result in a data breach.

Our partners

Novem IT are partners with industry-leading technology providers to ensure our customers have access to the best service possible.

Whatever your Cybersecurity needs, we can help
