

*Grainger & Worrall's Engineering and Technology Director, Keith Denholm discusses how mega casting could have a role to play in non-automotive industries, such as the delivery industry. Read the full transcript below.*

### **Will Mega Casting Influence Non-Automotive Industries?**

White van man has become more obvious now because of Amazon and home deliveries. A couple of acts are needed to either automate or massively clean up the whole delivery co2 footprint. I think lightweight, utilitarian commercial vehicles will. They are more innovative, more ambitious. Through that process, it's more creative. I'm not talking about commercial airliners; I'm talking about things that might displace some of the little regional jets and stuff which arguably could become hybridised and even electrified in the next generation.

Want to find out more about the role of sand casting in electric vehicle manufacturing? Read our free eBook, **Making EV Components with Sand Casting**.
