

VACANCY DETAILS

Department: GW Limited	Hours: 40 hpw
Job Title: Senior Engineering Manager	Job Ref: GW614
Place of Work: Bridgnorth	
JOB DETAILS <p>The Postholder will lead and manage the engineering function for Grainger and Worrall Limited to deliver world-class product quality for our customers. Engineering responsibility means specification of casting products and their processes of manufacture.</p> <p>The successful candidate will have a substantive experience in a primary manufacturing company transforming raw material to high value finished products and will have a strong grasp of the principles of fluid/thermo/mechanics and the ability to extrapolate these toward design development and improvement of casting products and processes and an awareness / capability in product and process simulation (FEA etc.). A recognised formal engineering qualification or demonstrable significant experience in relevant fields is required for this role, as are demonstrable experience of adapting to the changing market in order to effectively align with industry grand challenges and recent previous experience in a senior engineering role in a Tier 1 / 2 mid-size manufacturing / casting company. The successful candidate will be at least familiar with, but ideally converse with, aluminium automotive structures, engine, and transmission system applications.</p>	

HAVE YOU GOT THE SKILLS?
