

## ROBATECH AT PACK EX TORONTO

*From November 9-11, 2021 at the PACK EX in Toronto, Robatech presents a new dimension in gluing: the brand-new Vision adhesive melter and Performa heated hose allow safe gluing of packaging while saving time and energy.*

The Swiss manufacturer Robatech will showcase a new adhesive application equipment that raises reliability in the gluing of primary and secondary packaging to a new level. The Vision melter and Performa heated hose reduce energy consumption and make life easier for machine builders and users thanks to unique features.

With FlexPort, an innovative 45-degree connection surface for connecting heated hoses, the Vision melter offers flexibility for installation and system integration. At the Smart Terminal, an LED strip displays in changing colors current operating and status information. Even from a distance, operating personnel can recognize whether the gluing process is running smoothly or whether, for example, the adhesive needs to be refilled.

Vision melts even demanding thermoplastic hot-melt adhesives gently, maintains a constant adhesive viscosity and conveys hot melt at a consistent pressure to the application head: A prerequisite for reliable gluing results.

At the booth, Robatech will show how the new Performa heated hose can be connected error-free and without special tools to application heads and adhesive melters via PrimeConnect, an unequalled plug-and-play coupling. The fully insulated heated hose requires up to 45 % less energy than conventional heated hoses, such as Robatech's Enduro hose. Thanks to Performa's full insulation, the adhesive viscosity remains constant at the connection points – a key factor for excellent gluing results.

Robatech at the PACK EX Toronto: Booth 1142

## ROBATECH

Robatech optimizes the industrial hot melt and cold glue application with sustainable and innovative adhesive application systems. Since 1975, Robatech has been developing and producing high-quality control systems, application heads, melters, and dosing systems that make gluing processes more environmentally friendly, safe, and straightforward. The Robatech Group, headquartered in Muri/AG, Switzerland, is represented in more than 80 countries. More than 670 dedicated employees worldwide provide personal and fast customer support in a wide range of industries.
