

CC STORAGE SAFE

A highly secure cash storage and transfer system, CC storage safe protects banknotes against any attacks, efficiently and permanently. Due to its flexibility the CC storage safe can be configured to meet client's requirements.

Permanent protection

High capacity storage

Wrenching detection system

Customizable

Delayed or instant opening

Compact, this system has a storage capacity up to 12,000 banknotes. In the event of an attack, it uses an indelible security ink to permanently mark the contents as stolen. In addition, it can provide storage space for coins with its built-in metal cabinet (optional).

TECHNICAL DATA

Range	Notes Capacity	Ext. measures LxWxH (mm)	Int. measures LxWxH (mm)	Volume built-in cabinet (L)	Volume value box (L)	Power	Power consumption
CC 6000	6,000	510 x 352 x 985 (20"x13,85"x38,77")	345 x 115 x 327 (13,6"x4,5"x12,9")	89	13	220v	10w
CC 12000	12,000	510 x 352 x 985 (20"x13,85"x38,77")	345 x 185 x 327 (13,6"x7,3"x12,9")	89	20	220v	10w

SECURITY FEATURES

- Intelligent Banknote Neutralization System (IBNS)
- Configuration and management software
- Tamper proof –no authorized entry possible
- Time management – prevention against attacks
- Monitoring relays
- Double mechanical lock
- Secure access control
- Double authentication system (cash escort and customer)
- Equipped with a multiple wrenching detection system
- Event logging and reporting (black box, real-time clock)
- Electric mains power with battery backup (up 90 days autonomy)
- User defined time-restricted access

OPTIONS

- M2M communication
- GPS/GPRS module
- Fog system
- Liquid sensor
- Siren 110db
- Foam block

DESIGNED FOR EASE OF USE

- Top cash loading
- Configuration flexibility
- iButton for secure identification
- Status indicator

HIGH SECURITY INK

- High staining performance : 100% of banknotes and 20% of surface area of each note
- Fast ink staining response (milliseconds)
- High security ink :
 - including infra-red marker
 - cannot be removed (truly indelible)
 - tested and independently certified to meet international standards
 - non-hazardous (health and safety)
 - stained notes can be traced for ownership recognition
