

INCREASE COMMUNITY ENGAGEMENT!

Conversations by SchoolInfo is 2-way digital messaging for schools done right.

Conversations brings together the ease and familiarity of a text message and other popular instant and group messaging platforms with the administrative oversight and controls that are necessary in today's digital age. With Conversations, teachers can instantly chat directly with individual students and parents or easily create groups to share class documents, materials and assignments, answer questions, inspire engagement and more!

CommunityShare! by SchoolInfo Stories unfold. Make it easy to tell them.

Everyday in classrooms, on sidelines, stages and field trips, the stories of your school are happening. Empower teachers, parents and even students to be your storytellers in a safe and positive setting. CommunityShare is your content review solution to save time and manage how the story is told. All from a mobile device – those closest to the stories can submit news, pictures, and videos for approval before posting to your app and other channels like social media, your website and voice dial, text and email.

Video Messaging with SchoolInfo

Video has become the preferred method of gathering information for many today. Sharing video messages is so simple these days and with SchoolInfo that's no exception. Through a branded mobile app by SchoolInfo, administrators can send video messages directly to their desired audience with push notifications. Increase engagement within your community by sharing more personal messages coming from a familiar face. At SchoolInfo, we encourage you to share your messages with your audience how they want to receive them!
