REPAY Vault

The REPAY Vault is seamlessly integrated within the Sage 100 solution, allowing you to store customer payment credentials off of your own server for future use. REPAY Vault is a PCI/DSS compliant gateway with multiple reporting tools for reconciliation. Use our tokenized protection and data encryption to further enhance your security.

Type	Status	ID	Amount
Card Sale	Approved	4455865290 PMT-001402	20.00
Card Sale	Approved	4456059634 1234	90.00
Card Sale	Approved	4456511826	46.48

Level 3 B2B Rates

Level 3 processing allows you to receive discounted rates on Visa® and Mastercard® B2B transactions. Level 3 transactions use lower interchange rates than Level 1 and Level 2 transactions. Merchants wanting to receive Level 3 processing rates must be on an Interchange Plus Pricing plan. The Sage 100 integration from REPAY automatically sends the required data to ensure maximum cost savings for B2B transactions.

CertiPro E-Link Two-Way Sync for Magento

Integrate your Sage Software with Magento eCommerce by using CertiPro's Magento extension called E-Link. E-Link offers a two-way sync between Magento eCommerce and Sage ERP that can be customized to fit your business logic. E-Link handles all data connection points for business partner portals and other B2B/B2C eCommerce needs, eliminating errors from manual data entry.

Integrated Sage + Magento Payments

CertiPro offers Sage and Magento users a seamless integration with REPAY for secure payments. The integration accepts all payment types into CertiPro's E-Link, and then they flow directly into Sage - eliminating any need for duplicate entry. Normally, you have information stored in your website and information stored in Sage. However, with REPAY, you have one payment gateway for both platforms, providing you with the ability to access the same credit card token ID. This makes it easier to issue refunds and voids and process future payments. Transactions and payments also flow into a central database for reporting.
