

Sage 500

Integrated Payment Processing for Every Business

Integrated and Flexible

Work seamlessly within the business systems you already use to avoid manual entry and reduce error with an integrated payment solution.

- Tokenized credit card data simplifies PCI compliance
- Level 3 processing
- Credit card number safely stored within REPAY vault
- Multi-currency capabilities
- No installation, maintenance or set up fees
- 24/7 live support

Faster Funding

REPAY offers omni-channel B2C and B2B integrated payment solutions for every business. REPAY is a gateway and processor that is trusted by thousands of merchants daily to process payments. If you do not understand your bill, we will educate you on how you are currently priced.

REPAY works diligently to reduce risk and provide the best payment solutions for customers. Our payment solutions enable customers to benefit from multiple payment methods, Level 3 discounted rates for B2B transactions, increased cash flow with online payment portal capabilities and seamless integration to help customers save time.

REPAY Vault

The REPAY vault is seamlessly integrated within the Sage 500 solution, allowing you to store customer payment credentials off of your own server for future use. Our vault is a PCI DSS compliant gateway with multiple reporting tools for reconciliation. Use our tokenization and encryption capabilities to further enhance security.

Level 3 B2B Rates

Level 3 processing allows you to receive discounted rates on Visa[®] and Mastercard[®] B2B transactions. Level 3 transactions use lower interchange rates than Level 1 and Level 2 transactions. Merchants wanting to receive Level 3 processing rates must be on an Interchange Plus pricing plan. The Sage 500 integration from REPAY automatically sends the required data to ensure maximum cost savings for B2B transactions.

ClickToPay

ClickToPay is an integrated online payment portal that offers a simple and secure way to have invoices paid directly from Sage 500. Simply send a copy of the invoice or sales order via email. The customer opens the email and selects their preferred payment method - either credit card or ACH. Customers can create a profile and save card or bank account information for future payments.
