

Single Source for Card and EFT

Not all payment providers have the technology to support card and Electronic Funds Transfer (EFT) transactions, requiring you to partner with multiple providers, resulting in double work and separate reporting.

Implement payment solutions from REPAY to **process card and EFT** from a single source. Our easy-to-use, self-service platform simplifies reconciliation and reduces your costs.

Faster, Cost-Effective, and More Secure Processing

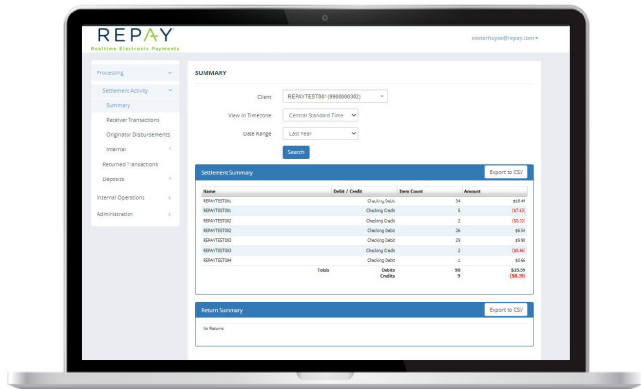

EFT supports digital customer payments, both one-time and recurring. Faster than traditional cheque processing, EFT debits occur on the date a payment is due, and you know almost immediately if you have been paid.

Processing fewer cheques in favor of EFT not only saves you time and eliminates costly paper processes, but also reduces manual errors and cuts the risk of fraud.

EFT Capabilities

- Submit transactions up to 3 times per day
- Pull back transactions after submission
- Resubmit transactions same day
- Process in near real time
- Experience competitive rates
- Reconcile using consolidated reporting

As many as
70%
of businesses reported being exposed to
cheque fraud¹

Always Available Support

Backed by our dedicated operational team, we help you provide an enhanced payment experience while improving your cash flow. We proactively monitor traffic and alert you of any processing errors or anomalies, and our experts are always available to help review your bank deposit reconciliation report.
