LAUNCH

G3-C UNIVERSAL GRIP

Product Name:

G3-C Universal, High Performance, Ergonomic Control Grip

Product Description:

Operator presence, trigger switches, side keypads, faceplate keypads and z-axis rotation are the exciting features of OTTO's ergonomically designed and customizable G3-C Universal Grip. Its high switch content capability increases the level of functionality, benefiting anyone who requires versatility in a grip.

With numerous faceplate selections, the G3-C can be customized from applications requiring basic control functions to those requiring high switch content. The G3-C can be panel mounted as a fixed control grip, panel mounted with z-axis, or it can be mounted on an OTTO JH, JHL and JHM joystick with or without z-axis.

Applications/Markets:

The G3-C is designed for use with OTTO's pushbuttons, rockers, toggles and Hall effect switches, and can handle many types of high-performance industrial vehicle, off-road, material handling and machinery applications.
