

Project Manager

We're looking for a Project Manager who will be responsible for overseeing projects in investment advisory, asset management and risk management. The ideal person will have a keen interest in Finance and IT, a client-oriented mindset and will be organized and resistant to stress. You should have a 3-4 years proven track record in software project management.

The Project Manager will be in contact with people from various backgrounds, both internal and external to the company, ranging from Finance, Marketing and Customer Experience to people with an IT background.

Responsibilities

- Ensure that all programs and projects are delivered in terms of project scope, definition, goals, cost, quality, technology, execution, schedule requirements and deliverables, while delivering planned business value
- Define the scope of the project with upper management and clients
- Lead the project from start to implementation
- Define project tasks, a scheduled work plan and resource requirements
- Efficiently coordinate project staff working on the project
- Act as an efficient functional back-up (e.g. help on functional requirement identification, specification drafting, testing, etc.)
- Ensuring that timing, quality standards and project commitments are met
- Monitors and manages Programs/Projects according to Gambit standard practices, tools and methodologies by ensuring a cross-impact business view
- Track project milestones and deliverables using appropriate tools
- Provide direction and support to project staff
- Constantly monitor and report on the progress of the project
- Analyze problems and suggest solutions in the best interest of the project and of the company

ABOUT GAMBIT

Gambit Financial Solutions is a European leading expert in Investment Advisory, Risk Management and Portfolio Optimization. It was created as a spin-off of HEC-Liège (Management School of the University of Liège).

While keeping strong ties with HEC as the motor of its R&D efforts, Gambit has evolved into a full-fledge commercial company. It has developed an international client base and implemented its solutions in various recognized financial institutions in Belgium, Luxembourg, France, Switzerland and beyond. Each of those solutions was built on strong expertise in IT and financial knowledge, and with client-centricity as a constant redline.
