

BEINCOURT® EXECUTIVE SUMMARY

As we head back into the physical courtroom, there is an overwhelming demand for the ability to have hybrid hearings. Everyone from court administrators to the information technology teams is trying to enhance the courtrooms to allow for this type of technology. BEINCOURT provides a scalable and seamless way to transition from in-person to hybrid court with the touch of a button.

Technical

- a. Speaker Microphones compatible for AVB setup
- b. CAT 5 Cabling required
- c. Sound reinforcement on base of speaker microphone
- d. Audio Input Jacks

BEINCOURT is a holistic audio-visual solution for the courtroom environment and is custom-built for the courtroom with language that Judges understand. Our courtroom packages come completely pre-programmed, kitted, and shipped directly to the courtroom's location.

Our flagship software controls all the endpoints in the courtroom and ensures that the hearing flow is smooth and the Judge can remain in complete control.

While BEINCOURT has multiple offerings in the form of packages, we can provide an a-la-carte solution or customize packages to meet the needs of each room. From audio enhancements to complete redesigns, BEINCOURT can help modernize and standardize all of your rooms for having efficient in-person, remote, and hybrid hearings.

OUR PARTNERS

Some of the technical features you will experience with the BEINCOURT technology solution are as follows:

Complete Audio Control

from the Crestron control panel (muting all microphones to control any audio sources and channels)
The Judge has access and can control at will.

Video & Screen Muting

(allows screens to be turned off individually or all at once)

White Noise

Injecting white noise in the room for sidebars

Hybrid Sidebars

Blending in-person and remote attendees into a single sidebar

Interpreter Hybrid Control

Interpreters have the ability to use their laptop, if remote, to control the interpretation session

Evidence Presentation

Previewing and distributing evidence

Simultaneous Interpretation

integration (interpreters can be onsite or remote)

Off/On System Control

Ability to turn on and off the system through the Crestron control panel

Annotation Capabilities

from touchscreens to courtroom and remote participants

Assisted Listening

(ADA compliant)

Select/Deselect Sources

Select/Deselec input and output sources

Enhanced Audio for Court Reporters

Court Reporter can access and use speaker microphone at their position for clear audio during the hearing.

Integrates With Recording Systems

Integrates with courtroom recording solutions, such as For the Record.
