

## FLOW<sup>Rx</sup>Connect

FLOWRx Connect enables the production and receipt of patient specific totes. Our integrated software platform drives smarter dispensing workflow. Build and automate your workflow as much, or as little, as you want by connecting and directing multiple patient and prescription orders from your PMR to your hub, warehouse and /or wholesaler.

FLOWRx Connect integrates seamlessly with FLOWRx Hub and FLOWRx Store to power your dispensing efficiency, data analysis and business intelligence. It controls the entire process from order management to complete labelled and bagged prescriptions.

FLOWRx Connect provides drug data integrity and validation by comparing a multitude of inventory management codes against the drug item code. It then records all relevant medication and patient data required for audit and regulatory purposes.

# FLOW<sup>Rx</sup>Connect

FLOWRx Connect works with most operating procedures and is able to interface with any PMR. It can also integrate with your order management system giving you complete flexibility to create patient specific totes.

## Centred Solutions is reimagining repeat prescription workflow, making the benefits of hub dispensing affordable and accessible to all UK pharmacies.

We are experts in the design, development and implementation of pharmacy workflow and automated repeat prescription dispensing systems.

Our focus is to enable better patient care and consultation, save time on administration, support revenue generation, and eliminate errors in prescription dispensing.

Our scalable solutions deliver whether you're a single store pharmacy, manage multiple pharmacies or operate an existing pharmacy hub or warehouse facility.

Our experienced team has spent many years developing new ways to improve pharmacy workflow - our job is to make your job easier as pharmacy faces major changes in the next few years.

That's why we developed the FLOWRx suite of pharmacy workflow solutions, including FLOWRx Connect, FLOWRx Hub and FLOWRx Store, plus a host of smart tools and service support solutions.

### Save money

Reduce stock holding by up to 40% and improve stock control.

### Free up time

Reduce the amount of time staff spend performing manual, redundant and administrative tasks.

### Eliminate errors

Adopt a continuous, safer and traceable automated workflow.

### Drive revenue

Spend more time face-to-face with patients on clinical work, services and improving patient care.
