

FLOW^{Rx}Hub

FLOWRx Hub is a fully integrated pharmacy workflow, fulfilment and automation platform that optimises the process of repeat prescription dispensing for pharmacies wanting to create or automate a dispensing hub.

Benefit from faster workflow, increase your capacity and grow your business. With the ability to create custom-made solutions to fit your operational needs, our state-of-the-art robotic technology labels, sorts, bags and totes original packs for patient prescriptions accurately and at speed.

Barcode and RFID technology ensures full end-to-end tracking and recording at every stage of the fulfilment process.

Interfacing with any PMR, FLOWRx Hub with FLOWRx Connect can also integrate with your WMS, current robotic storage and dispensing system, wholesaler or a combination of supply sources to give you complete flexibility to purchase to your best advantage.

FLOW^{Rx}Hub

Each solution is entirely scalable, enabling operations to grow and increase capacity, speeding up existing processes.

FLOWRx Store enables you to scan, label, and sort medications directly from the tote into patient specific baskets with no need to unpack onto shelves. Exceptions that are not received from the wholesaler or warehouse such as fridge items or controlled drugs can be added to the tote prior to labelling or later added

to a patient basket before bagging. Once the order is complete simply scan the basket to print the bag label and scan each item into the bag to complete the order ready for dispense.

Centred Solutions is reimagining repeat prescription workflow, making the benefits of hub dispensing affordable and accessible to all UK pharmacies.

We are experts in the design, development and implementation of pharmacy workflow and automated repeat prescription dispensing systems.

Our focus is to enable better patient care and consultation, save time on administration, support revenue generation, and eliminate errors in prescription dispensing.

Our scalable solutions deliver whether you're a single store pharmacy, manage multiple pharmacies or operate an existing pharmacy hub or warehouse facility.

Our experienced team has spent many years developing new ways to improve pharmacy workflow - our job is to make your job easier as pharmacy faces major changes in the next few years.

That's why we developed the FLOWRx suite of pharmacy workflow solutions, including FLOWRx Connect, FLOWRx Hub and FLOWRx Store plus a host of smart tools and service support solutions.

Save money

Reduce stock holding by up to 40% and improve stock control.

Free up time

Reduce the amount of time staff spend performing manual, redundant and administrative tasks.

Eliminate errors

Adopt a continuous, safer and traceable automated workflow.

Drive revenue

Spend more time face-to-face with patients on clinical work, services and improving patient care.
