

Quality, Precision, and Innovation

For three generations, **Engineered Profiles** has been a trusted source for OEMs and the production and supply of their extruded thermoplastic parts. Our reputation for strict tolerances, cost-effective production, and timely deliveries has helped us forge long-term partnerships with leading manufacturers. Our secret? We're a privately held company committed to building relationships that last as long as our products do.

Engineered Profiles has designed and manufactured plastic extrusions for more than 60 years. Behind each innovation stands a team of quality-obsessed people ready to shape your ideas into functional profiles.

QUALITY AND PERFORMANCE

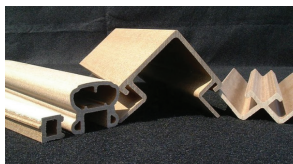

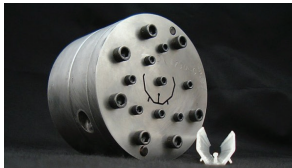

Our mission is to provide state-of-the-art extruded plastic products that exceed our customers' expectations. At Engineered Profiles you get more than parts. You get solutions to your needs. We partner with your engineers to design products that perform better-functionally and aesthetically.

WHAT WE OFFER

Our custom-profile manufacturing and extrusion services include:

- **Raw materials and processing:** PVC, ABS, PE, PP, Acrylic, ASA, among others as well as custom in-house blending of rigid PVC.
- **Fabrication:** Precise fabrication of parts during and after extrusion; custom process available.
- **Cellular extrusions:** Density-reducing solutions for wide cross-section extrusions.
- **Multi-material extrusions:** Multi-material extrusions to add strength and create integral hinges, bumpers, and seals.
- **Part decoration:** Cost-effective custom coloring, surface texturing, and film lamination.
- **Wood composite:** High-performance material blends and tooling for indoor and outdoor applications.
- **Lean manufacturing:** Computer-assisted, continuous improvement practices to reduce your costs and production times.

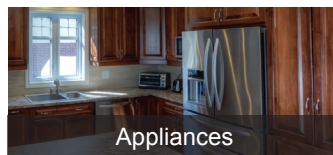

- **Technical resources:** 60 years of expertise in extrusion manufacturing, profile design, material analysis and formulation, fabrication tooling, and quality assurance.

OUR PEOPLE

Material expertise. In-house tooling. State-of-the-art processes. All are important features of our manufacturing business. But what you'll value most are our quality-driven people.
