

# KAYMERA ENTERPRISE **MOBILE** SECURITY

The Benefits of Mobility. Minus the Risk.

**What, How** and **Why**  
of personal & business privacy protection

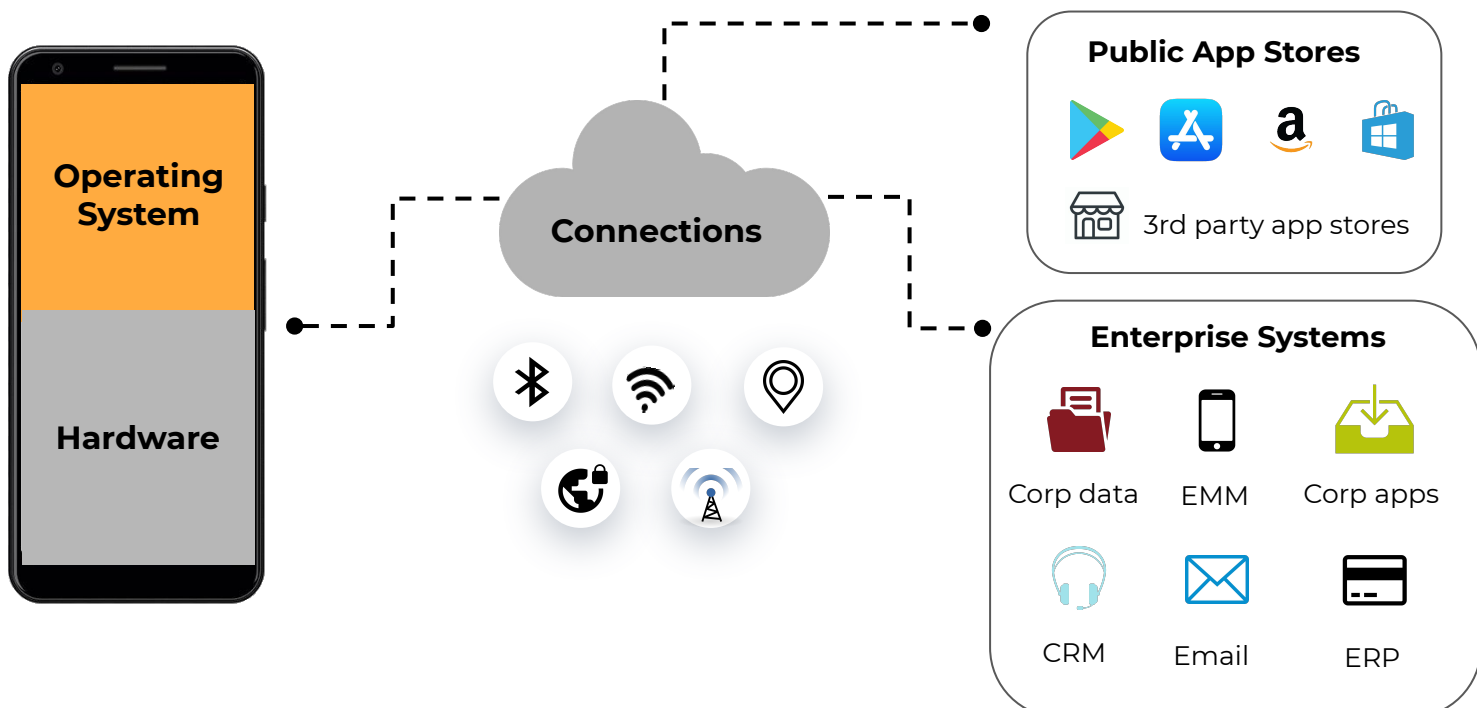

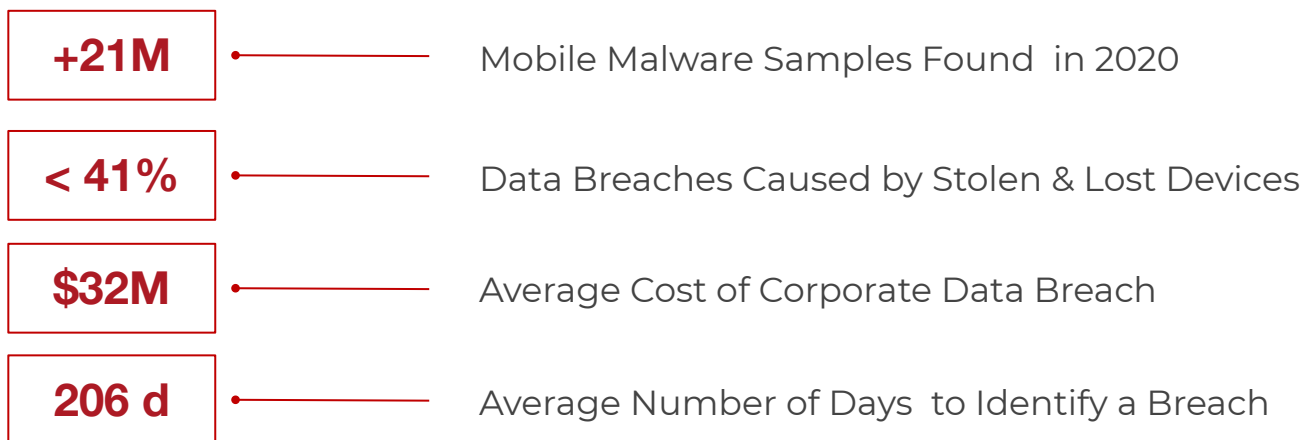

# Kaymera for Business. The Big Picture.

**Do you really know how safe is you data** when you access your company's Email, sensitive documents, or share files via your smartphone?

**Over 5 billion people** worldwide perform their daily personal and business activities on mobile. Mobile security hasn't always been a top priority for Enterprises and business owners, therefore a growing number of poorly protected enterprise mobile networks and devices has become an easy target for cyber criminals.

## Overview of Common Mobile Security Threats

# 5 Reasons to Choose Kaymera Enterprise **Mobile** Security Platform.

**Customizable Modular Solution.** A 360° mobile security platform that consist of **3 modules**: centralized management console, fully encrypted smartphone, secure messaging & calls app. Choose what fits your needs the best, integrate 1 solution, or take it all.

**Seamless Integration.** Advanced mobile security technology embedded into all Kaymera modules **natively integrates with specialized software apps**: from Dev to HelpDesk solutions. Easy to configure, maintain, manage.

**Total Protection.** Kaymera powerful mobile threat detection & prevention engine equips organizations with a bulletproof security solution to **protect** all potential attack points: **devices**, apps, **data** transfer, and more.

**Superb Usability.** Perfectly balanced security, productivity and usability. We deliver personal **confidentiality** and business data **protection** to all mobile endpoints across your organization, allowing employees to work safely the way they want, on whatever devices they want with no **user experience** trade-offs. .

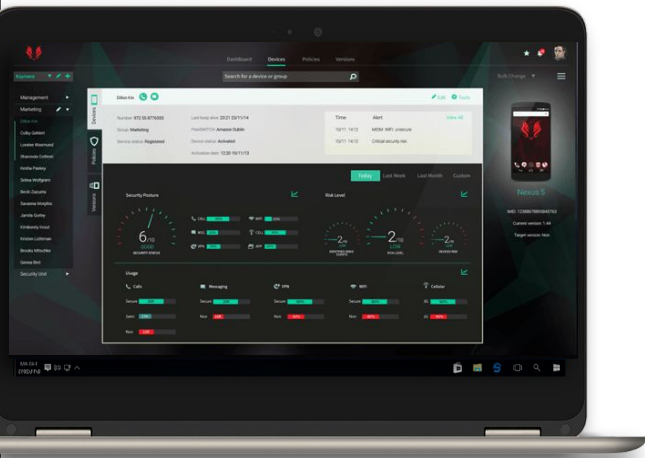

## **Cloud-based or On-premise Implementation.**
