

5 Week Time to Value

Implementation at Colorado Mesa University

Overview

While many student success tools take months to years to be implemented, CMU and Degree Analytics kicked off at the end of July and were fully implemented by the start of the Fall semester (i.e. 1 month). Not only was implementation done in a month, results were derived right away. By measuring student engagement across campus, CMU was able to impact student success within the first week of the semester.
