

Campus Presence

With changing reengagement plans and models, colleges and universities need an effective and efficient way to monitor physical campus activity to assure the safety and security of students, faculty, and staff.

Degree Analytics builds solutions to solve the most important challenges facing higher education.

Degree Analytics **Campus Pulse** platform allows for the frictionless, automated reporting of individual presence on your physical campus. Regardless of your reengagement model, this automated platform will allow for better operational planning, communication, and support for those who are present within the confines of your campus infrastructure.

Implementation Timeline

During our one week implementation window, the Degree Analytics team will map your wireless network infrastructure and do a one time import of data from your SIS. We then implement an automated daily exporting process for data to be sent to a dedicated, secure cloud location for analysis and reporting.

Reporting & Messaging

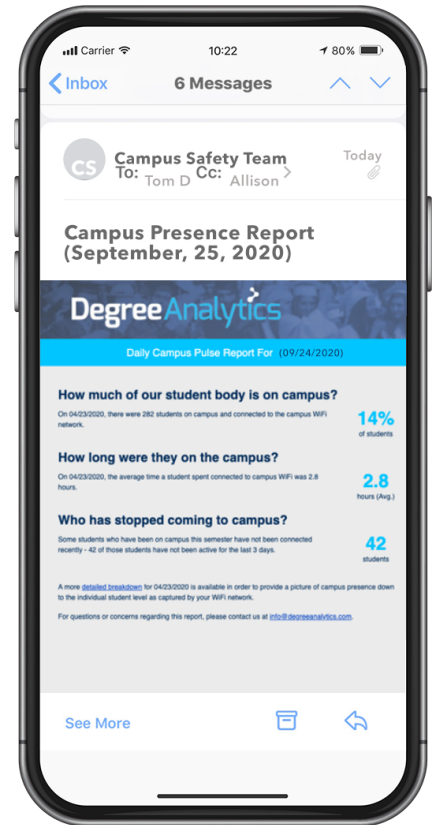

Campus Presence provides an automated report to authorized users which documents the number of people present on campus daily. Also includes is the amount of time they were on campus during the period. The system then provides an exportable list of those individuals, the times they were on campus, as well as, a list of those whose presence on campus has changed.

Investment

Campus Pulse is priced based on a campus size and enrollment plus an implementation fee of \$1.00 per campus network access point. Contact us for your custom investment summary.

Daily Presence Report
