

# Unleashing the Power of AI

AI is already transforming our world, from enhancing customer experiences, to empowering organizations with the right answers. **And it's just the beginning.**

## The **Potential** is Profound

**61%**

of C-level executives say AI will **transform their industry** in the next 3 years<sup>1</sup>

**84%**

believe they won't achieve their **growth objectives** without scaling AI<sup>2</sup>

**86%**

have increased AI year on year **(2020-2021)**<sup>3</sup>

## But the Reality is **Challenging**

**87%**

struggle with **long deployment timelines**<sup>4</sup>

**>50%**

of data scientists' time is spent on deployment<sup>4</sup>

**Immature Operations**

Disconnect between **data science** and business outcomes<sup>5</sup>

## Meet **AI Cloud**

Unlock the next generation of **AI**.

Single Platform for **All Users**

**Unified** End-to-End Platform

**Clear and Trusted** Business Outcomes

Deployed and Operated **Anywhere**

Data from **Any Source, Any Type**

**Modular and Extensible**, Building on Existing Investments

## DataRobot AI Cloud Takes It **Even Further**

The DataRobot AI Cloud Platform harnesses the power of **Augmented Intelligence**, a capability that combines the best of **humans** and **machines**.

### Machine

Speed and scale  
Efficiency  
Rule-based solutions

### Augmented Intelligence

Unifying the unique strengths of **Human** and **Machine** Intelligence

### Human

Intuition and control  
Experience  
Tailored solutions

## The AI Cloud **Transformation**

### From

**Disconnected teams** leveraging disconnected tools

Increasingly **distributed** and **diverse data**

A **complex model** for data and infrastructure across **multiple public cloud providers**

**Immature operations** with limited monitoring and governance

**Unpredictable** outcomes and **uncertain** business results

### To

**Collaborative teams**, including data scientists, analytics experts, IT and business users

**Unified data** of all types and from all sources in a **single AI system** of record

**Flexible deployments** across any cloud, the data center and the edge with unified operations

**Enterprise-level security, governance** and **operations** that allow the business to deliver mission critical AI

**Clear, powerful** and **trusted business insights** that turn data, fast

## Businesses are Already **Benefiting**

### Speed

“

DataRobot allows us to **rapidly iterate** on thousands of combinations of models, data preparation steps, and parameters that would take days or weeks to do manually.<sup>6</sup>

– Black & Decker

### Impact

**\$200M**

**increase in revenue** for a leading manufacturer through **precision demand forecasting**

### Scale

**60**

**projects** utilizing **3,000 models** launched by The Adecco Group in just three weeks<sup>7</sup>

## Why **DataRobot?**

One of the most widely deployed and proven AI platforms in the market, our platform has been perfected and refined across nearly every industry.

**1.5M**

**hours** of engineering

**10**

**years** of innovation

**1T**

**predictions** made by DataRobot users

**1M**

**active projects** supported by our team of data scientists
